

September 12, 2017

To Whom It May Concern:

This letter is to confirm Valentin Jovellanos's possession and current access to Practice Fusion's electronic health records (EHR) technology, Product Version 3.6. Our records indicate that Valentin Jovellanos registered for Practice Fusion's EHR on 3/4/2016.

Practice Fusion is a free, cloud-based EHR, and as a result, there is no purchase order or receipt generated when providers adopt the technology. However, each new user electronically accepts all terms of the [Healthcare Provider User Agreement](#) upon adoption of the EHR.

Practice Fusion's NCQA 2014 Patient-Centered Medical Home Summary Approval Table shows which auto credit factors and points you may receive as part of your PCMH 2014 application. To ensure these autocredit points are added to your application, you must provide NCQA with the following when you submit your application:
